1. INTEGRATING TO AMAZON SHIPPING

In this section, you will learn how to integrate TradePeg to be able to use Amazon Shipping for all of your orders.

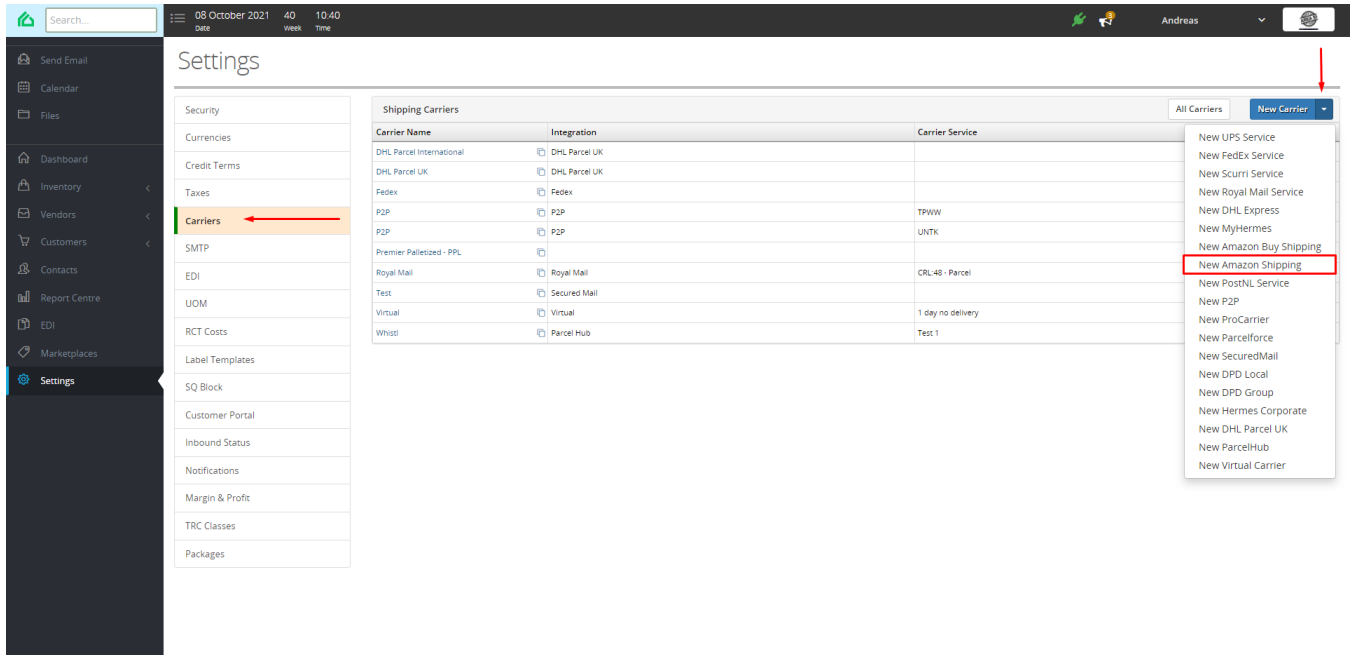

Follow this process if you already have an [Amazon Seller Central Account](#):

Prior to setting up Amazon Shipping please ensure that your Amazon Marketplaces are configured correctly on TradePeg.

Step 1 – From anywhere on TradePeg, click on **Settings**, then **Settings** again.

Step 2 – Select Carriers. In the top right you have a dropdown menu wherein you can select 'Amazon Shipping'.

Step 3 – The below screen will appear. Highlighted are the recommended/mandatory fields for set up of every Amazon Shipping service.

The screenshot shows the 'Shipping Company Details' form. Several fields are highlighted with red boxes: 'Amazon Shipping' (Carrier Name), 'Amazon Premium' (Service Name), 'Auto Generate Label' (checkbox), 'SWA-UK-PREM' (Service Id), 'Marketplace' (dropdown), 'Validate delivery date' (checkbox), and 'None' (Print Queue).

Carrier Name	Active	Service Name	SCAC
Amazon Shipping	<input checked="" type="checkbox"/>	Amazon Premium	

Auto Generate Label	Internal Reference	Tracking URL Pattern	ETA (Days)
<input checked="" type="checkbox"/>			

Billing Service	DNT	Shipment Cost	Display Name
	<input type="checkbox"/>		

Service Id	Marketplace	Label Format
SWA-UK-PREM		Default

Collection days delay	Collection hour	Validate delivery date
		<input checked="" type="checkbox"/>

Print Queue
None

Amazon Shipping Integration Guides

- **Service ID:** Can be found and/or requested within your Amazon Shipping account. It is the unique identifier for each service (eg. SWA-UK-PREM – Amazon Premium)
- **Marketplace:** A dropdown menu here will allow you to designate the marketplace for which you are creating the service.
- **Validate delivery date:** When ticked, this means that labels will not be generated unless the designated service is able to fulfil the order by the set Due date.
- **Auto generate label:** When the order is confirmed and deemed fulfillable by the assigned carrier service, a label will be automatically generated.

Step 4 – The service is now set up. To verify that set up was entirely successful and carrier labels are accessible, you may generate a Test Sales order, assign the configured service, and click the green icon in the top right to generate a Shipment.

NOTE:

- The products within the Test Sales Order should include volumetric and/or weight information.
- The Shipping Address should be a genuine address.

More info on XXXXX? Go to their Website or Watch a Demo

Step 7 – The below screen will appear. Highlighted are the recommended/mandatory fields for set up of every Amazon Shipping service. *The Marketplace dropdown menu will be populated with the App integration you set up in **Step 3**.*

The screenshot shows the 'Shipping Company Details' form. The following fields are highlighted with red boxes:

- Carrier Name:** Amazon Shipping
- Active:** ☒
- Service Name:** Amazon Premium
- Auto Generate Label:** ☒
- Service Id:** SWA-UK-PREM
- Marketplace:** (Dropdown menu)
- Validate delivery date:** ☒

Other visible fields include SCAC, Internal Reference, Tracking URL Pattern, ETA (Days), Billing Service, DNT, Shipment Cost, Display Name, Label Format, Collection days delay, Collection hour, and Print Queue.

- **Service ID:** Can be found and/or requested within your Amazon Shipping account. It is the unique identifier for each service (eg. SWA-UK-PREM – Amazon Premium)
- **Marketplace:** A dropdown menu here will allow you to designate the Shipper Central Account previously set up via Integrated Apps.
- **Validate delivery date:** When ticked, this means that labels will not be generated unless the designated service is able to fulfil the order by the set Due date.
- **Auto generate label:** When the order is confirmed and deemed fulfillable by the assigned carrier service, a label will be automatically generated.

2. PRINT SETTINGS

Printing through Firefox:

The very best print quality is found by enabling PDF's to be opened in Acrobat Reader and not Acrobat web browser add in, which is generally the default for Windows. Press the three horizontal bars in the top right hand corner, press "options" on the drop down, and press "General" on the left hand side:

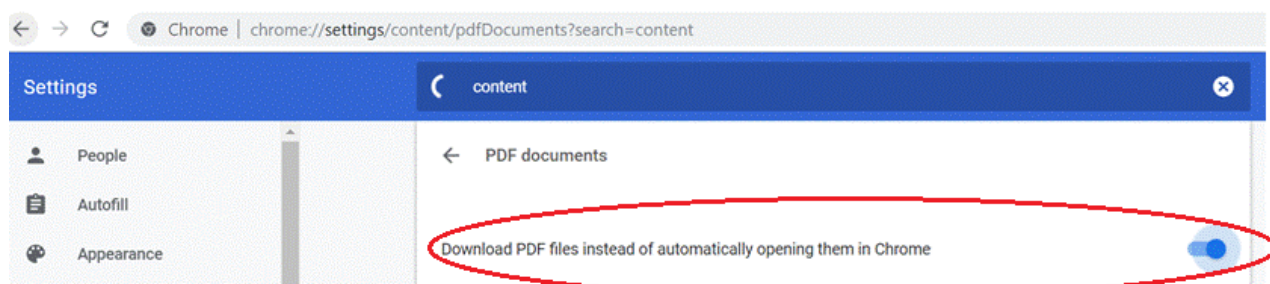

Scroll down to Applications, select “Portable Document Format (PDF)” and change to “Use Adobe Acrobat Reader DC (default)”. If this option is not available, you will need to install the desktop version of Acrobat Reader first.

Printing through Google Chrome

- 1) Open Google Chrome browser.
- 2) Enter the following link in the URL:
`chrome://settings/content/pdfDocuments?search=content`
- 3) Click the slider to enable Download PDF files instead of automatically opening them in Chrome, making the slider blue.

3. DATA NEEDED TO CREATE A LABEL

Shipment Data required for creating a label				
	Data Input	Mandatory	Additional comments	What will the data be used for?
1 Shipment 'Delivered to' address	Name	Conditional		
	First line of address	Conditional	* Only required for Off-Amazon Orders	
	City	Conditional	* On Amazon orders will obtain this information from Order ID	
	Post Code	Conditional		
	State or Region	Conditional	* Only required for Off-Amazon Orders * On Amazon orders will obtain this information from Order ID * Only Required in the US	Data will be used to plan shipment journey and return estimated delivery date to shipper and recipient
	County Code	Conditional	* Only required for Off-Amazon Orders * The two-digit country code. In ISO 3166-1 alpha-2 format * On Amazon orders will obtain this information from Order ID	
	Phone number	No	* If this data is not given, then no tracking or delivery notifications will be automatically sent	This data is used to send delivery updates to the recipient UNLESS the shipper or recipient has opted out of notifications
2 Shipment 'Pick up' address	Email	No	* If this data is not given, then no tracking or delivery notifications will be automatically sent	In addition, the driver is able to contact the recipient via the app (but does not have access to the data as the app masks both the recipient and driver's details)
	Name, first line of address, city, post code, country code, state or region	Conditional	* Only required for Off-Amazon Orders * On Amazon orders will obtain this information from the Order ID * Pick up Address must be the same address entered in Shipper Central account	
3 Return to Address	Name, first line of address, city, post code, country code, state or region	No		
4 Ship Date	Ship date and time (YYYY-MM-DD H:MIN:SS)	No	* If no ship date entered, label creation time is considered to allocate the shipment to the relevant pick up slot * If shipper does send shipdate time, it should be at least 15 minutes before desired pick up slot start otherwise the shipment will be allocated to the next available pick up slot (pick up slots are visible in shipper central account)	Data will be used to identify optimal pick up time to meet customer promise
5 Package Specifications	Dimensions: Height, Width, Length (Inch/Meters)	Yes	* Currently you can only create one label per package * One package can have multiple items * You can leverage your integrator to apply package dimensions	Data will be translated into pricing to be passed back to shippers as a rate
	Weight of Package (kg, g, lbs, oz)	Yes		Data will be translated into pricing to be passed back to shippers as a rate
	Insured Value (GBP)	Yes		If this data is not accurately passed by shipper, there is a risk of receiving fee penalties
	Items	Conditional	* Required for On Amazon orders	
	Hazmat (Package specific)	No		
6 Item Specification	Item value (GBP)	No	* ASIN code required for On Amazon orders	
	Item quantity	Yes	* Serial number is required for On Amazon orders to guarantee non-fraudulent items	Data will be translated into pricing to be passed back to shippers as a rate
	Item weight (kg, g, lbs, oz)	Yes	* Currency used is based on the currency of the local (USD for US, GBP for UK)	Data will be translated into pricing to be passed back to shippers as a rate
	Item Description	No		
	Hazmat	No		
7 Channel Details	Channel Type (Amazon/External)	Yes	* If this is an Amazon Order, the order number must be specifically noted in the Channel Details	It is important that the shipper works with the integrator to input the right channel type for Amazon orders, as knowing this ensures Amazon will return ship methods that meet SFP requirements
8 Label Specification	Format (ZPL, PDF, PNG)			
	Width, Length, Unit (Inch) DPI	No	* Default label will be PNG DPI 203 4x6 if value is not entered	

4. FAQs

Label Printing

- **When should I print the labels?**

TradePeg offers significant functionality when it comes to **automatically printing labels**. The most common configuration is within the scanners on marking a Package as completed, labels will generate and print automatically (as a shipment/consignment is created). They will print via 'TradePeg Print Station' to whichever label printer has been assigned to the user.

Alternatively, you can pack goods on the PC platform and 'Create a Shipment', consequently generating a label, which is accessible and printable from the Sales Order screen.

Label

- **Shall I add the dimensions to my items in the inventory?**

This is **strongly recommended** due to it being beneficial to multiple areas of the system. It is of added importance with respects to assigning carriers, as services often rely upon having volumetric and/or weight information to deem an order as fulfillable. Failure to supply dimensions can therefore lead to inaccurate allocation of carrier services, resulting in complications and additional charges.

- **Shall I add the value to my items in the inventory?**

This is **strongly recommended** as it contributes to the efficacy of many facets of the system (financial reporting, costing, targeting profit margins, tracking landed costs etc.).

Concerning carriers specifically, certain services are often designated based on value and therefore without this information you risk encountering complications arising from incorrect allocation of services.

- **Which is the right mapping for Amazon Shipping?**

SWA-UK-PRIME-PREM > Next Day shipping service - On Amazon orders.

SWA-UK-ECO > Standard delivery service - On Amazon orders.

SWA-UK-PREM > Next Day delivery service - Off Amazon orders.

Ongoing support

- Please contact TradePeg Support on 0333 344 5026 for issues related to the API and set up.
